G-S PLASTIC OPTICS Announces New Website at www.gsoptics.com

(June 23, 2015) Rochester, NY – [G-S PLASTIC OPTICS](http://www.gsoptics.com), a leading manufacturer of precision polymer optics, today announced it has launched its new website at <http://www.gsoptics.com>.

The site has been upgraded to better represent the innovative solutions that G-SPO offers to companies in the medical, commercial and defense industries. A wide array of sophisticated polymer optics is now being produced through highly refined manufacturing techniques. The unique nature of injection-molded optics demands a very disciplined approach during the component design and development phase. G-SPO anticipates this site will be a helpful resource for customers considering a program utilizing state-of-the-art polymer optics in their system applications.

The new website features a clean design, easy navigation, and direct access to helpful links. Users will be able to do the following when visiting the site:

- Review the process to develop and deliver a cost effective custom solution, using optical grade polymer materials, for their optics requirement
- Search G-SPO's catalog polymer optics components that are on the shelf and ready to ship for prototyping or production needs
- Read publications and download technical documents to help them optimize the services that G-SPO has to offer
- Initiate the request for quote process and benefit from G-SPO's superior customer service

Andy Germanow, CEO, comments, "The members of our optics team are experts on the key elements of production including thermoplastic resins, molds and molding machines, prototyping, diamond turning, thin film coating and metrology. The new site will be used as a hub where customers can go to capitalize on the team's collective years of experience and knowledge."

About G-S PLASTIC OPTICS

G-S PLASTIC OPTICS specializes in the custom manufacture of precision polymer optics for use in LED illumination systems, imaging, scanning, and detection applications worldwide. The company, located in Rochester, NY and founded in 1916, produces injection molded aspheric and free-form lenses, and mirrors, as well as Fresnel and diffractive optics. In addition, the company has in-house capability to provide custom designed diamond turned and injection molded prototypes, thin film and reflective coatings, and integrated optical solutions to meet a wide range of military, medical, commercial, and consumer markets. G-S PLASTIC OPTICS is registered with the Directorate of Defense Trade Controls (DDTC) as a manufacturer of defense articles.
